All units have 4-stage filtration. All units are 14" diameter.

ModernDay Warranty

ModernDay warranties all its power units against electrical component failure for a period of three (3) years. Any parts or repairs (excluding filters) required within the first three (3) years will be furnished free of charge by the authorized dealer from whom the power unit was originally purchased. ModernDay will extend the warranty on all its power units for an additional three (3) years --- for an overall coverage of six (6) years---provided the motor brushes are inspected and replaced (if needed) at the end of the first three (3) years. There is a nominal service charge for the warranty extension and the inspection must be done by an authorized ModernDay dealer. ModernDay further covers its products with a Lifetime Warranty against defects in materials and workmanship. In the event an authorized dealer is not nearby, ModernDay will honor and perform all warranty and/or warranty extension services for a nominal charge, provided the power unit is returned to the factory, freight prepaid, and it can be verified that all services were performed by an authorized ModernDay dealer. This warranty does not apply to commercial applications, misuse, abuse, or if the unit has been worked on by an unauthorized person.

About M.D. Manufacturing, Inc.

Based in Bakersfield, California, M.D. Manufacturing, Inc. was founded in 1961 as a family owned and operated business. We do not claim to be the largest manufacturer of built-in vacuum units, but we strive in being unsurpassed by any other manufacturer in quality and engineering design. Our continuing goal is to maintain the high standard of quality and design that has made M.D. Manufacturing the leader in the central vacuum industry. To assure you that this is no idle boast, we encourage you to compare ModernDay central vacuum units with any other central vacuum unit - regardless of price. Once you've made the comparison you'll understand why we say, "When a better unit is built, it will be built by M.D. Manufacturing, Inc. in the USA".

ModernDay

Central Vacuum Systems

centralvacuum.com

Because you have better things to do with your time...

Regardless of your lifestyle, you'll find that ModernDay has been designed with you in mind: for the meticulous housewife who demands the absolute best, or for the family on the go who is only interested in "quick & easy." Either way the powerful ModernDay system will enhance the quality of your life.

- Health** - Eliminates the re-circulation of germ-laden air by venting the exhaust air *outside* your living area.
- Savings** - Extends the life of your carpets and furniture by cleaning better - in less time.
- Value** - Like other built-in appliances, a built-in vacuum system adds to the selling features of your home.
- Quiet** - Because the power unit is located outside your living area, the sounds commonly associated with portable vacuums (such as uprights and canisters) are virtually eliminated.
- Versatile** - Superior cleaning on all carpets, wood and tile floors, stairs, drapes, furniture, workshops, and automobiles.
- Filtration** - 4-Stage filtration uses a combination of cloth, mesh, and paper elements.
- Assembly** - Ease of assembly or disassembly for convenience in servicing or replacing components.
- Mounting** - Without equal in simplicity and versatility of mounting.
- Convenience** - No heavy unit to move around, no electrical cords to trip over. Just a single lightweight hose and power head.
- Construction** - 20-Gauge, all-metal, welded steel construction for maximum strength and "powder-coat" painted inside and out.
- Utility Inlet** - For the added convenience of vacuuming directly from the power unit use the utility inlet.
- Trash Capacity** - Largest trash capacity available.

Compare! Compare! Compare!

M.D. Manufacturing, Inc. is the only manufacturer of built-in vacuum units that, as of the date of publication, encourages in bold print the comparison of our units with all other central vacuum units. A manufacturer is only as good as its willingness to invite comparison. Examine and prove to yourself why ModernDay is unequalled in quality and performance.
